This is a truly wonderful remedy for Indigestion, Dyspepsia, Juandice, liver complaint, constipation, and Debility, curing after Nature's own method, by Nature's own Agent, the Gastric Juice.

I PHalf a teaspoonful of Persin, infused in water, will digest or dissolve, Sive Possids of Roast Beef in about two hours, out of the stomach.

PEPSIN is the chief element, or Great Digesting Principle of the Gastric Juice—the solvent of the Food, the Purifying, Preserving, and stimulating Agent of the stomach and Intestines. It is extracted from the digestive stomach of the Ox, thus forming an Artificial Digestive Finia, precisely like the natural Gastric Juice in its chemical powers, and furnishing a complete and perfect substitute for it. By the aid of this preparation, the pains and gevils of lindigestion and dyspepsia are removed, just as they would be by a healthy stomach. It is doing wonders for Dyspeptics, curing cases of Debility; emaciation, nervous decline and dyspeptic consumption, supposed to be on the verge of the grave. The Scientific evidence upon which it is based, is in the highest degree curious and remarkable.

in which various articles of food as meat and eggs, will be seftened, changed and digested just in the same manner as they would be in the human stomach." Dr. COMBE, in his valuable writings on the "Physiology of Digestion," observes that "a diminution of the due, quantity of the Gastric Juice is a prominent and all prevailing cause of Dyspepsia;" and he states that "a distinguished professor of medicine in London, who was severely afflicted with this complaint, finding everything else to fail, had recourse to the Gastric Juice, obtained from the stomachs of living snimals, which proved completely successful."

Dr. GRAHAM, author of the famous works on "Vegetable Diet," says: "It is a remarkable fact in physiology, that the stomachs of animals, macerated in water, impart to the fluid the property of dissolving various articles of food, and of effecting a kind of artificial digestion of them in no wise different from the natural digestive process."
